

Have You Heard About Monroe County's Best Kept Secret???

MONROE COUNTY COMMISSION ON AGING

Monroe County has an array of services to help senior citizens in their daily lives but it falls on the Monroe County Commission on Aging to coordinate those services.

In 2007, the Commission budgeted \$2,799,581 for programming for local residents 60 and older. The money comes from the .50-mill tax levy that homeowners pay annually. This year the millage is expected to generate about \$3 million. The difference between what is budgeted and what the millage is expected to generate comes from the Commission on Aging's fund balance. These county funds match several thousands of additional State and Federal dollars that our county receives for additional senior services.

By coordinating with agencies that offer senior services, the Commission hopes to maximize services and avoid duplication. Money is funneled to the agencies through the Commission but not before the agencies provide a detailed plan on how they intend to spend that money. The Commission's pledge is that the greatest benefit will go to those most in need and the most frail will receive the highest priority.

Your Tax Dollars Working in the Community
