

Monroe County Health Department 2016 Annual Report

Vision

Healthy Monroe County – A Knowledgeable, Safe, and Active Community

Mission Statement

The mission of the Monroe County Health Department is to protect the public through health promotion, disease prevention, and preservation of the environment.

Agency Values

Respect – *We provide client centered services in a friendly environment with consideration and courtesy to our partners, clients and colleagues.*

Professionalism – *We are skilled and dedicated to the services provided and present ourselves to clients, peers, and community partners with appropriate appearance and behavior.*

Communication – *We utilize excellent listening, oral and written communication skills.*

Attitude – *Our demeanor, actions and words spoken with partners, clients and colleagues reflect a positive attitude.*

Integrity – *We ensure honesty, accountability and fiscal responsibility for our actions to the community and its citizens.*

Teamwork - *We provide effective and efficient service through collaboration with partners, clients and colleagues.*

Leadership – *We demonstrate leadership related to quality public health for all citizens of Monroe County, our partners, clients and colleagues.*

Message from the Health Officer

On behalf of the Monroe County Health Department and the Board of Commissioners, I would like to present the 2016 Monroe County Health Department Annual Report. The Monroe County Health Department is dedicated to the health of the County of Monroe and we are proud to provide services that help make Monroe County one of the best places to live, work and play.

This report will reflect the many successes and challenges over the last two years in Public Health in Monroe County, Michigan. The Monroe County Health Department utilizes multiple data sources to monitor the health of the county. Issues such as substance abuse, mental health, and sleep-associated infant deaths are some of the areas that we have focused our efforts on through education and raising awareness in the community. The Monroe County Health Department continues to provide core public health services to the residents through vaccination, providing Women, Infants and Children (WIC) to qualified clients, support of pregnant women and infants, reproductive health, emergency preparedness and environmental safety.

In 2015, the Community Health Assessment was presented at a community wide event. The assessment was completed through the Building Healthy Communities Coalition (spearheaded by the Health Department) which consists of many partner agencies. The next step was to establish and implement a Community Health Improvement Plan to address the priority areas identified in the assessment. The priority areas consist of Adult and Youth Weight Status, Adult and Youth Mental Health, Adult and Youth Substance Abuse and Adult and Youth Safe Driving. The coalition is working throughout the county to address these areas and regular meetings are held to update and evaluate the plan. Our health education program along with MCOP, YMCA and Goodwill received grant funds through the Community Foundation to provide nutrition education to seniors as a result of the assessment.

The Monroe County Health Department provided assistance beyond our usual support to one of our local jurisdictions related to their beach area and contaminated water. DNA water samples were collected in collaboration with Michigan Department of Quality (MDEQ) and Michigan State University (MSU) to support determining the source of the contamination. The Environmental Health Division also conducted mosquito surveillance via mosquito trapping within the county as an attempt to identify whether either of the two species that carry the Zika virus is located in our county. This surveillance will continue through the summer months of 2017.

The Personal Health Division began providing communicable disease prevention and treatment support for clients admitted to Salvation Army Harbor Light substance abuse treatment program. Routine disease testing and treatment have been provided weekly including Hepatitis C testing, sexually transmitted infections (STI) and Human Immunodeficiency Virus (HIV) screening as well as administration of vaccines when needed. In addition, this division of the Health Department successfully implemented a newborn visiting program, allowing every mother in the county 1 home visit from a Public Health Nurse along with an additional campaign for infant safe sleep awareness.

I would like to thank the Monroe County Board of Commissioners and Mr. Michael Bosanac, County Administrator, for their continued support of local public health.

Sincerely,

Kim Comerzan, MSN, RN, CNS
Health Officer/Director

Programs and Services of the Monroe County Health Department

Environmental Health

It is the responsibility of Environmental Health to ensure a healthy relationship between the public and its environment by enforcement of federal, state and county rules and regulations put in place to protect the safety and well being of Monroe County residents. This is handled through food service inspections, water quality management, community health and safety, sewage management and solid waste management.

Personal Health Services

Various programs are required by the Michigan Public Health Code to aid in assuring the health of the community. Of those required services, immunization and communicable disease control through reporting and investigation are expected. Also provided are sexually transmitted infection testing and treatment, blood pressure checks, injection medication administration, pregnancy testing, head lice checks and treatment and reproductive health for women and teens.

Maternal & Child Services

These programs assist women in achieving a healthy pregnancy, birth and childhood through the formative years. Programs include the Maternal Infant Health Program, where pregnant women covered by Medicaid can receive nursing, social work and nutrition services to support their pregnancy and infant up to one year of age; Children's Special Health Care Services offer assistance for families with children who have chronic or disabling medical conditions to pay for medical care and coordination of services; Women, Infant & Children (WIC) supplemental food program providing nutrition assessment, education and healthy food supplements for eligible pregnant, breastfeeding and post-partum women, infants and children up to age five.

Health Promotion

The health education program "Live Well Be Well" offers education courses for overall health in both individual and class settings. Courses focus on nutrition, physical activity and prevention of chronic illnesses and are provided in schools, through grocery shopping tours, in class room settings, during activities as well as in support group settings. Adult/Child CPR and Infant CPR and safety classes are also being offered at the Health Department. Live Well Be Well publishes a monthly newsletter posted to the Health Department website that offers classes each month along with healthy recipes. The Hearing & Vision program provides hearing and vision screening for all pre-school and school-age children within all Monroe County schools annually.

Monroe Dental Clinic

Through a partnership with My Community Dental Centers (MCDC), quality dental care is being provided to Medicaid recipients and low income, uninsured adults as well as children covered by Medicaid, Healthy Kids Dental and MI Child. The dental clinic was established in 2013 and is located within the Health Department building. MCDC began accepting patients covered by other private third party insurances in 2016. However, they have remained committed to the underserved in Monroe County.

Public Health Preparedness

Through a variety of partnerships with community agencies, this program develops, implements, and evaluates disaster preparedness plans. Protection of Monroe County residents during emergencies is a critical concern. Design and participation in exercises that test our response capabilities include annual FERMI drills, medication dispensing sites and emergency contact notification. The Medical Reserve Corp (MRC) is a component of Public Health Preparedness whereby volunteers are trained to respond and assist in multiple types of emergencies.

Medicaid Insurance Assistance

Identified Health Department employees are trained to assist individuals and families in completing an application for health insurance, including all state-funded insurance plans and Medicaid.

Medical Examiner Office

Some deaths are referred to the county medical examiner for investigation to determine and certify the cause of death per the Michigan Public Health Code. This includes deaths that occur more than 10 days after the deceased was seen by a physician, the cause of death appears to be other than the illness or medical condition for which the deceased was being treated or if the attending physician cannot accurately determine the cause of death.

Additional Accomplishments and Partnership Initiatives

- The Monroe County Environmental Health Division along with other department staff played a major role in the FERMI graded exercise and in particular took responsibility for the decontamination/congregate care set up for that exercise.
- Finalized the Monroe County Solid Waste Plan and gathered support from local municipalities. By December, 2015, received 20 out of 24 municipal support resolutions for the plan, as submitted.
- Worked with the Emergency Management Department on establishing an emergency response plan, including a comprehensive contact list for public utilities emergencies.
- Administered 185 Zostavax (Herpes Zoster virus) vaccine to adults aged 60 and above. The vaccine works to prevent Shingles. We continue to turn the revenue from billing in this program over to help provide the vaccine to those who are unable to pay or are uninsured.
- Participated in the Celebrate Children event at the Mall of Monroe.
- Hosted the Earth Day event at the Monroe County Community College with approximately 475 participants.
- Participated in the Monroe County Preparedness Expo at the Mall of Monroe.
- The Monroe County Board of Commissioners sponsored 2 additional medication collection events and collected 1047 pounds of medication.
- Implemented a WIC breastfeeding Peer Counseling program.
- Expanded WIC breastfeeding classes for anyone in the community.
- Began CPR classes through health education program including 75 adult classes, 66 infant classes, and performed 13 car seat inspections.
